STATEMENT

5

6 This bill requires the State Debt Report to include an
7 affordability analysis to provide executive and legislative
8 policymakers a clear, data-driven framework for evaluating and
9 establishing future State debt management and issuance priorities.
10 The purpose of the bill is to enable a more fully informed fiscal
11 policy discussion on the State's long-term debt portfolio to ensure
12 sufficient financial capacity for essential capital projects.

13 The bill requires the State Debt Report to include a detailed
14 analysis and narrative discussion of the State's ability to afford an
15 increase in its overall debt and the affordability of the amount of
16 any such increase. The affordability analysis will include:

- 17 • An estimate of revenues generally or specifically available for
18 the next 10 fiscal years to pay debt service;
- 19 • An estimate of additional debt issuance for the next 10 fiscal
20 years for the State's existing borrowing programs;
- 21 • A schedule of the annual debt service requirements, including
22 principal and interest allocation, on outstanding State debt and an
23 estimate of the annual debt service requirements on the additional
24 debt projected for existing borrowing programs for each of the next
25 10 fiscal years;
- 26 • The calculations and listing of pertinent debt ratios, including,
27 but not limited to, debt service to State revenues available to pay
28 debt service, debt to State per capita personal income, and debt per
29 capita for the State's net tax-supported debt;
- 30 • The estimated debt capacity available over the next 10 fiscal
31 years benchmarked to various debt ratios of debt service to State
32 revenue exceeding current actual percentages;
- 33 • A comparison of the State's debt ratios with the comparable debt
34 ratios for the 10 most populous states;
- 35 • An overview of the State's general obligation credit rating and a
36 review of the criteria used by municipal securities rating services in
37 rating governmental obligations; and
- 38 • Such other information as the Commission on Capital Budgeting
39 and Planning deems relevant to the foregoing matters.

40 The bill requires State agencies, independent authorities, and
41 other entities issuing debt secured by State revenue, or assisting in
42 the issuing of that debt, to provide all information determined
43 necessary by the commission in order to complete the debt
44 affordability analysis.

45 In an effort to finance essential capital projects for the benefit of
46 State residents at favorable borrowing terms, the State must strive
47 to establish a stable and improved credit standing with investors.
48 Authorizations of state debt must take into account the ability of the

1 State to meet its total debt service requirements in light of other
2 demands on the State's fiscal resources. Thus, this bill will assist
3 the Executive and the Legislative branches to exercise a long view
4 of full, fiscally relevant and future-looking analysis of debt
5 affordability in order to exercise prudence in undertaking the
6 authorization and issuance of debt.
