STATEMENT

10

11 This bill would require registered professional nurses (RNs) who  
12 are initially licensed by the New Jersey Board of Nursing, on or  
13 after the effective date of the bill, to attain a baccalaureate degree in  
14 nursing within 10 years of their initial licensure. The bill authorizes  
15 a licensee who is not able to attain the degree within a 10-year  
16 period to request a one-time (up to two-year) extension of the  
17 requirement in order to complete the degree.

18 The purpose of this bill to encourage newly-licensed RNs to  
19 advance their education in order to deliver the best quality care to  
20 their patients in an increasingly complex health care environment.  
21 Studies comparing patient outcomes with the educational  
22 background of nurses demonstrate that in hospitals with higher  
23 proportions of nurses educated at the baccalaureate level or higher,  
24 surgical patients experienced lower mortality and failure-to-rescue  
25 rates.

26 Under the provisions of this bill, RNs will continue to be able to  
27 enter the nursing profession through associate degree and diploma  
28 nursing programs. These new nurses will then have 10 years to  
29 advance their professional education and complete a baccalaureate  
30 degree in nursing. The requirements of the bill will not affect  
31 nurses who received their nursing license prior to the effective date  
32 of the bill, although it is the sponsor's intent that currently licensed  
33 nurses also seek to advance their education and training.

34 The bill also deletes obsolete language concerning licensure fees  
35 and duration of licenses, which is now provided for in Chapter 1 of  
36 Title 45 of the Revised Statutes.
