Building futures for New Jersey and its Higher Education Community
Our mission is to support world-class higher education in New Jersey.

As a public fiduciary, our business is to help our college and university clients obtain low-cost financing for the development of their facilities.

We are helping our clients invest in the treasures that are our colleges and universities, so they can provide the opportunities for our citizens that will build the future of all New Jersey.

– Certification Pursuant to Executive Order No. 37
The New Jersey Educational Facilities Authority is pleased to present its 2011 Annual Report. Throughout the year, we continued our long-standing commitment to provide assistance to New Jersey’s colleges and universities through alternative, low-cost methods of financing academic and auxiliary facilities.

Amid changing financial markets, historically low rates and a lingering recessionary economy that still presents considerable challenges for our state and nation, we secured financing for seven institutions through eight transactions with a total combined value of $370 million. Approximately 80 percent of that amount helped bring new projects to fruition ranging from equipment leasing, to new facility construction, renovation and major maintenance.

As 2011 unfolded, it did so against a backdrop of heightened discussion in New Jersey among policy makers and stakeholders alike about the need for resources to invest in our colleges and universities. NJEFA’s support for higher education represents one of the primary ways the State supports investment in New Jersey’s institutions to meet growing student populations and evolving demands of 21st century education. Since our inception in 1966, the Authority has completed more than $13 billion in total value of financings. During the past decade alone, we have managed just under $8 billion in transactions. We have dedicated a portion of this report to highlighting several projects financed during this period that have had a positive impact on the respective institutions, their students and the communities they serve.

The role of the Authority as a partner with our colleges and universities continues to evolve. NJEFA embarked on a new chapter as 2012 got underway with Governor Christie’s appointment in April of Derek Hansel as the Authority’s Executive Director. Under new stewardship, and a renewed commitment to client service, the Authority is looking at every opportunity for lowering the cost of capital financing for colleges, development of new and innovative financing alternatives and keeping a firm hold on operational spending.

As we look to the future, we are committed to helping our colleges and universities secure cost-effective sources of capital to finance campus facilities and we look forward to our continued partnership in advancing higher education. Our thanks to Governor Christie and Members of the Legislature for your support of NJEFA throughout the year. Thank you as well to NJEFA’s Board Members for their continuing commitment, dedication and leadership, and to our exceptional staff for their dedication to our continued success.
Advancing New Jersey Higher Education
For nearly half a century, the New Jersey Educational Facilities Authority has been a catalyst for advancing higher education in New Jersey. We have done so by helping the State’s public and private colleges and universities secure the lowest possible cost of capital to finance improvement and expansion of their campus facilities.

Over the years, as the Authority’s role has evolved and expanded, we have become an integral partner to our client institutions. Today, the Authority is dedicated to client service and core to every one of our transactions is in-house expertise in the financial markets, tax and securities law and post-issuance matters.

Our business philosophy is to provide institutions with the best and most efficient options for financing their physical plant needs and to ensure they have the tools necessary to evaluate those options and select the most appropriate solutions. Our hands-on management of transactions ensures that institutions receive top-flight service and value before accessing the capital markets, during the financing process, and after a transaction closes through final maturity of the financing.

This successful approach has earned the Authority an impeccable reputation for fiscal responsibility and integrity, which combined with a zero percent default rate over our entire history, carries the practical benefit of lower interest rates for our colleges and universities. It also allows the Authority to build financing, credit and debt history with the State’s higher education institutions. This long-term relationship, in turn, enables the Authority to better serve the financing goals and student-centered missions of New Jersey’s colleges and universities.
The mandate of NJEFA is to issue tax-exempt and taxable debt on behalf of qualified public and private institutions of higher education and to offer other financial debt instruments to facilitate their capital finance and development needs. The bonds and other financial instruments of the Authority are special and limited obligations, secured and repaid by the institution for which it provides financing.

NJEFA’s bonds and other obligations generally have no guarantee of repayment by the State. Exceptions occur only when specifically authorized by statute. In such cases, the State assumes a repayment obligation and identifies a repayment source under special legislatively authorized programs. Some of those programs include the NJ Higher Education Capital Improvement Fund, the Equipment Leasing Fund and the Higher Education Facilities Trust Fund.

NJEFA financing can be utilized by eligible institutions for a variety of projects including construction, renovation, improvement, and expansion of academic buildings such as classroom facilities, laboratories, libraries and research facilities. Also eligible are auxiliary service facilities such as dining halls, utility plants, dormitories, athletic facilities, parking facilities, student unions, administration buildings and campus health care facilities. Authority financing can be utilized as well for the acquisition of capital equipment such as high technology and research equipment.

Eligible institutions, including accredited two- and four-year colleges and universities, identify their capital and construction requirements and then work with NJEFA to develop financing that will meet the capital requirements of their projects. Working with the institution, NJEFA will then take its transaction to the financial market, capitalizing on the lower interest rates the Authority can obtain as a public fiduciary.

The Authority manages its clients’ financings from beginning to end. During the pre-issuance process, members of the Authority staff help prepare rating agency presentations and legal documents, conduct due diligence, and negotiate the sale of the bonds or manage the competitive bidding process.

After a transaction closes, staff members review and process all bond fund requisitions, invest bond proceeds, retain rebate service providers, retain monitoring services for interest rate derivatives, and assist borrowers with tax and security law issues, among others. Staff also observes our clients’ compliance with continuing disclosure, monitors the capital markets for refinancing opportunities, and helps colleges and universities with rating agency surveillance.
Who we are

Oversight and direction of NJEFA is entrusted to a seven-member board composed of five public, unsalaried members appointed to five-year terms by the Governor with confirmation by the New Jersey Senate. The State Treasurer and Secretary of Higher Education serve as ex-officio Members and our statute provides for gubernatorial veto authority over all actions of our Members.

The day-to-day operations of the Authority are managed by a skilled and experienced staff led by an Executive Director who is also the chief executive officer of the Authority.

2011 NJEFA Highlights
Building on the Authority’s long legacy, 2011 was a year that continued to advance higher education through sound financial transactions that helped provide low-cost capital for the development of academic and auxiliary facilities. The year’s favorable interest rate environment allowed some of the Authority’s clients to refinance existing debt for savings. Others were able to capitalize on market conditions to finance new campus improvement projects at historically attractive rates.

During the year, NJEFA managed and closed eight transactions for seven institutions. These transactions had a total par value of approximately $370 million. About 80 percent or $293 million represented new money for campus improvement projects designed to enhance competitiveness and allow participating institutions to address their physical plant challenges.

The largest transaction was completed on behalf of Princeton University for multiple enhancements to its main and researched-based campuses in Princeton. Other transactions included equipment leases, facilities upgrades and renovations, the Authority’s first-ever direct bank purchase for a public institution, and several refinancings that resulted in significant cost savings for participating institutions.

This spectrum of activity in 2011 exemplifies the array of financial services that NJEFA offers as a partner to higher education in New Jersey. We continue to focus on finding smarter, more efficient ways to create additional and low-cost capital for our clients to achieve their institutional missions and enhance their bottom line.
2011 Transactions

The New Jersey Educational Facilities Authority completed 8 financings for 7 schools totaling over $370 million. More than $293 million funded new projects for 6 schools, and nearly $77 million was for refundings.
2011 Transactions

Kean University

This fixed-rate equipment lease transaction enabled Kean University to acquire and install HVAC equipment. It also provided financing that enabled the University to purchase sewer line replacement equipment and make upgrades to elevators, hallways and bathrooms at the University’s four oldest student residences (pictured).

Drew University

The Authority completed a $12 million direct placement bond transaction on behalf of Drew University. Bond proceeds will be used by the University to help finance annual deferred maintenance needs including various capital improvements to campus facilities and grounds; equipment acquisition and installation; and upgrades and improvements to classrooms, offices and other facilities.

This transaction represents the first of two authorized renewals provided for under the terms of the 2008 Series I bonds. The structure of the 2008 Series I issue authorized the issuance of an initial par amount of bonds of $12 million, advanced in increments of $4 million per year for three years. The structure also included 2 optional renewals under each of which an additional $12 million could be issued for a 3-year term and 4-year term, respectively. The 2011 tranche will be received in increments of $4 million per year for the 3-year term. The 2008 Series I bonds have an aggregate total cap in an amount not to exceed $40 million.
Ramapo College of New Jersey

The Series 2011 A fixed-rate transaction was a combined new money/refunding financing for Ramapo College of New Jersey. Approximately $8 million of bond proceeds helped the College finance completion of renovations to its student center (pictured). The project included repairs and replacement of infrastructure along with the acquisition and installation of equipment to modernize the facility and improve energy efficiency. The transaction also refunded certain outstanding bonds that were originally issued to finance the construction of student residence halls, a dining hall and fitness center; renovations and improvements to the student center and the Havemeyer House; Phase VII and VIII Housing; an addition to the athletic building; and telecommunications equipment.

$19,090,000
- 3.325% True Interest Cost
- $424,713 or 3.69% in Net Present Value Savings
- Closed May 10, 2011
- July 1, 2021 Final Maturity

Rowan University

Attractive market conditions in May helped facilitate significant savings for the University’s Series 2011 C fixed-rate refunding. In addition to the all-in cost savings, the refunding facilitated the release of a $3.8 million debt service reserve fund. The Series 2001 C Bonds were originally issued to acquire land and to refund prior series of bonds.

$30,045,000
- Refunding of Series 2001 C Bonds
- 3.70% True Interest Cost
- $3,831,495 or 10.32% in Net Present Value Savings
- Closed May 25, 2011
- July 1, 2025 Final Maturity
The 2011 Series A bond transaction achieved aggressive pricing levels and realized significant net present value savings for Seton Hall University. The refunded bonds were originally issued for an addition to a parking garage, dormitory fire suppression equipment and to refund prior series of bonds.

Thomas Edison State College

The Authority completed a fixed-rate equipment lease transaction on behalf of Thomas Edison State College. The financing helped the College to replace a shelving system (pictured) in the State Library with a high density powered mobile storage system that maximizes storage capacity and optimizes space. The upgrade to the current system added safety standards, reliability, user-friendly features, and productivity.
Princeton University

The 2011 Series B financing on behalf of Princeton University helped to finance various projects identified in the University’s 10-year capital plan. Approximately 60% of bond proceeds were used for the construction of four new buildings, including a Neuroscience and Psychology complex (pictured), a high performance computer center, the Andlinger Center for Energy and the Environment and the completion of the new chemistry building. An additional 20% of the proceeds financed large renovation projects to the Firestone Library, Jadwin Hall and Hoyt Laboratory and the remaining 20% financed major maintenance projects.

Thomas Edison State College

The Authority completed an $8 million direct purchase transaction on behalf of Thomas Edison State College. The Series 2011 D fixed-rate bonds helped the College to finance major renovations to its Kuser Mansion (pictured). Kuser Mansion is a Trenton landmark on the National Register of Historic Places and houses College offices and The John S. Watson Institute for Public Policy.
The Authority’s 2011 volume of activity declined 30 percent from 2010’s total volume of nearly $531 million. This decrease mirrored national trends in municipal market issuance, in particular for the higher education sector. Borrowing in 2011 across most market sectors decreased from 2010 and may be attributed to the slower than optimal economic recovery, strong issuance in 2010 due to the expiration of the Build America Bonds (BABs) program, as well as increased emphasis nationwide on fiscal discipline.

Total Market Issuance by Sector

Source: Thomson Reuters
National municipal bond volume hit a 10-year low in 2011 as general uncertainty in the economy deterred many issuers and investors from engaging in the financial markets. Total municipal bond issuance of $295 billion in 2011 was down about 32 percent from 2010’s record high volume of $433 billion. Issuance for colleges and universities was no different. Higher education’s share of total municipal bond issuance was 8 percent or $22.2 billion, down approximately 40 percent from 2010 issuance.

Media predictions of high default rates may have dampened municipal bond sales during the first half of 2011. Also contributing to the decrease in activity early in the year was the fact that some issuers and borrowers accelerated financings for new projects in 2010 in order to take advantage of the last opportunities under the popular BABs program, which sunset on December 31, 2010.

The second half of the year however, experienced somewhat of an upsurge in issuance with approximately $176 billion, or 60 percent of the year’s total volume being issued during the 3rd and 4th quarters. Issuance picked up as investors sought haven from the continuing volatility of the equity markets. By year-end, municipal bonds were shown to be the best performing fixed-rate sector, according to The Bond Buyer, as demand outpaced supply.
A Lasting Impact
Since the Authority's creation by the Legislature 45 years ago, we have completed 461 new money and refunding transactions with a total par value of over $13 billion.

NJEA's primary objective over the years has been to assist New Jersey's colleges and universities in making the capital investments necessary to provide world-class education to as many students as possible. Our efforts have also contributed to a wealth of lasting benefits for New Jersey's citizens beyond improved academic environments. They have helped preserve some of our State's most historic buildings which date back to the founding of our nation and its first colleges. They have ensured an environment to educate and train our high caliber workforce that is the very foundation of our state and local economies. They have provided for academic facilities that enrich the state culturally as they offer our communities vast opportunities to enjoy music and the arts; to provide diverse employment prospects; and to further emphasize our State as a great place to live, work and raise our families.

Since the Authority's creation by the Legislature 45 years ago, we have completed 461 new money and refunding transactions with a total par value of over $13 billion. Of that amount, $5.6 billion is outstanding as of December 31, 2011. Under our state-backed programs, combined, the Authority issued $1.2 billion bonds from 1993 to 2004 that financed state-supported grants for improvements to capital facilities, equipment leases, technology infrastructures, dormitory fire safety projects, public libraries and more.

A Decade of Significant Accomplishments

In the last ten years alone, the Authority has managed transactions totaling just under $8 billion on behalf of our colleges and universities. Through these transactions, we have facilitated over $1.9 billion in financings for new projects at public institutions and more than $2 billion for private institutions.

Many of the Authority’s financings during this period show the tremendous human impact of our colleges’ ambitious projects that have benefitted higher education, the students and faculty they serve, and the state of New Jersey as a whole. Some of these projects are profiled in the pages that follow and exemplify the enduring legacy of the Authority’s mission. These facilities have enabled New Jersey colleges and universities to provide a truly state of the art environment, emphasizing efficient and effective form as well as function in order to best deliver higher education in the 21st century.

Source: New Jersey Educational Facilities Authority
The College of New Jersey
School of Education (2010)

The College of New Jersey is currently constructing a three-story, 70,000 square-foot facility to house its School of Education. Characteristic of many buildings on campus, the School of Education is being constructed in the Collegiate Georgian style of architecture. It will also be consistent with the American College and University Presidents’ Climate Commitment of achieving climate neutrality by maintaining LEED principles through design and construction. Completion of the building is scheduled for the summer of 2012.

Elementary education is among the most popular majors at the College. The new School of Education will be better equipped to serve the increased enrollment and address the growing demand for careers in the education field. Of the 1,898 degrees conferred in the 09-10 academic year, almost half were awarded in the Education major; triple that of the next highest major, Business.

Montclair State University
Frank Sinatra Hall (2009)

Frank Sinatra Hall at Montclair State University opened in 2010 and is one of the newest residence halls on campus. The six-story, Spanish Mission style complex was built to house 303 students and features suite-style living. Careful interior planning of the facility helped achieve maximum maintenance efficiency and accommodations for the needs of physically challenged students. Campus life for students living in the Hall is enhanced through the building’s design, which includes a lounge on each floor and a community kitchen to promote social activities. It also provides convenient access to classrooms and student centers with a shuttle bus pick up/drop off loop, service yard and ample parking.

Most of the 18,500 students enrolled at the University are in-State students, and approximately 4,300 live on campus; numbers that continue to increase.
The Richard Stockton College of New Jersey
Campus Center (2008)

The Campus Center was the largest construction project on campus since the College’s inception and is now the new focal point of the Galloway Township campus. The iconic 155,000 square-foot facility includes the College bookstore, food service and dining facilities, lounges, event facilities and a theater. One goal of the Campus Center development project was to provide a one-stop shop for students by including office space for student services such as the career center, financial aid and bursar’s office. Moving these offices to a central location freed up much needed classroom space in other campus buildings. The Campus Center allows the College to offer a broad range of communal and cultural activities for the more than 8,000 students. Located in a federally protected pinelands reserve, Stockton has long been an advocate of the environment and maintained a commitment to preserving their Pine Barrens location. Stockton earned a spot on Princeton Review’s Green Colleges list by demonstrating this commitment to sustainability and environmental education. Accordingly, the Campus Center was based on a sustainable design with LEED principles throughout. It uses 25 percent less energy than standard construction, 40 percent less water and was built with low emitting adhesives, sealants, paints and coatings. The new building utilized recycled materials and features water efficient landscaping, rain gardens of indigenous and adapted plant species and an energy management system for automatic and efficient heating, cooling, ventilation, and lighting.

Passaic County Community College
One-Stop Career Center (2010)

The three-story, 68,000 square-foot academic building constructed on the College’s campus is a joint venture between the Community College, the State of New Jersey and the County of Passaic. The first two floors are sub-leased to Passaic County and the State for use as a One-Stop Career Center while the third floor of the building is used by the College as additional classroom space. The Career Center provides employment information including resume development, job search resources and on-the-job training and is a resource for the students enrolled at Passaic Community, as well as faculty, alumni and the community. The convenient campus setting allows for the community to develop or refresh their confidence and interviewing skills and to explore various employment options. In today’s challenging economy, providing New Jersey residents with information about and access to avenues of potential employment is essential. Every spring, its Career Fair attracts many job seekers, providing them with the opportunity to meet with a variety of employers.
The Institute for Advanced Study is among the world’s premier international centers for academic inquiry and theoretical study in the sciences and humanities. In 2007, the Institute opened The Simons Center for Systems Biology in an extension constructed as part of the Institute’s primary facility, Bloomberg Hall. This extension moved all components of the School of Natural Sciences into one building and allowed the Institute to provide its visiting and resident scholars with a more collaborative and modernized environment. The 13,750 square-foot extension is a distinct addition but was designed to ensure a natural flow to maintain and encourage communication between the disciplines. It contains office and meeting spaces and houses the Institute’s central computing staff and computer equipment room.

The Bloomberg Hall extension features the first green roof built in Mercer County and is planted with various low-to-no maintenance plants. The water retention layer of the roof was designed to allow the soil to soak up water over time and reduces water runoff. Systems to monitor and control energy use and to generate power were also included in the design.

Georgian Court University promotes a campus environment that encourages the physical and emotional well being of its faculty, staff and students. In 2007, the Wellness Center was constructed with that commitment in mind. It is an environmentally friendly, state-of-the-art facility that includes a two-court arena that supports the basketball, volleyball and physical education programs; athletic fields for softball, soccer, and lacrosse; a fitness center; an eight-lane track; and tennis courts. Situated in close proximity to other buildings, the Wellness Center helps create a campus center and brings a village-like atmosphere to the University. Approximately 3,000 students and 100 faculty and staff use the facilities each year.

The new facility has allowed the University to expand its academic programs and it now offers degrees in Exercise Science, Wellness and Sports, and a new Dance major. These new programs are housed in the Wellness Center and are equipped with a training/exercise science laboratory, multipurpose studios, classroom space and offices.

Construction of the Wellness Center was guided by LEED principles, using recycled materials and water and energy efficiency. Sustainable design features include high efficiency light fixtures and sophisticated lighting controls to harvest natural daylight.
Continued Commitment to Addressing Future Needs

In New Jersey and across the country, long-term demand for higher education continues to be strong. New Jersey’s colleges and universities have made tremendous progress in advancing their academic offerings, in building capacity and modernizing campus facilities.

Despite their progress, however, the need for financial resources for capital investment is still great. Aging infrastructure needs rehabilitation and replacement and college populations keep growing creating demand for additional classroom and residential space. Our changing world requires curricula that prepare students for 21st century opportunities, and modern facilities that support the delivery of these programs.
In New Jersey and across the country, long-term demand for higher education continues to be strong; signaling not only the need for infrastructure investment but also that there is significant economic value to a postsecondary education degree. Enrollment at New Jersey institutions since 2000 has increased 31.8 percent and degrees and certificates are up nearly 50 percent. In addition, demographic forecasts show the projected number of high school graduates in New Jersey growing modestly and remaining at a high level over the next ten years, as will the existing international interest in attending U.S. universities.

Source: New Jersey Educational Facilities Authority; New Jersey Higher Education
Higher education is vital to our State. Statistics have shown that a college education is a primary driver of higher incomes over the long term. Colleges and universities themselves are also essential employers for professionals in a wide variety of fields. Today, 37 percent of the State’s more than 8.79 million residents hold at least an associate’s degree, and nearly 35 percent, the 6th highest in the nation, have a bachelor’s degree or higher. New Jersey’s highly educated workforce and network of outstanding colleges and universities positions the State to compete effectively to achieve economic growth as our nation continues its recovery.

The New Jersey Higher Education Task Force, created by Governor Chris Christie and Chaired by former Governor Thomas H. Kean, acknowledged the vital role of New Jersey’s institutions of higher education in supporting the future economic prosperity of our state. The recommendations of the Taskforce emphasized the need for future capital investment in higher education to remain competitive and to contain escalating costs of attending for students and their parents.

The recommendations have fueled a vigorous discussion among policy makers and stakeholders alike about the future of higher education in New Jersey. Central to that debate are shared objectives; to keep college costs down while expanding opportunity and improving the quality of education that our colleges and universities deliver.

As the debate continues, and as potential new opportunities emerge, the Authority will continue to be focused on helping our colleges and universities meet future capital financing needs in the most efficient and cost-effective ways possible. We look forward to working with the Administration, the Legislature and with our institutions to develop new and better ways in which we can support these shared objectives and continued advancement of higher education in our State.
