On behalf of the Board and staff of the New Jersey Educational Facilities Authority (the “Authority” or “NJEFA”) we proudly present our 2017 Annual Report.

In accordance with Executive Order No. 37 (2006) this report also serves as the comprehensive annual report of the Authority’s operations and finances. The Authority’s financial statements are available on the Authority’s website https://www.nj.gov/njefa/.

The NJEFA fills a critical role in building the infrastructure that supports higher education in New Jersey. The Authority’s work in helping the State’s colleges and universities secure low-cost financing solutions is a bridge to the development and maintenance of innovative, state-of-the-art academic facilities. These facilities help our students receive the best educations possible. They are the environments that build and sustain our highly educated and well-trained workforce that is necessary to ensure New Jersey remains a leader in the global economy.

The results of our efforts in 2017 led to a record year of activity as we issued $1.42 billion in bonds on behalf of eight New Jersey colleges and universities. Seven of these institutions sought financing through the Authority for new capital projects that included construction and renovation of dormitories, academic buildings, parking lots, student centers and a medical and health sciences academic center, among others. Refunding transactions during the year also brought record levels of debt service savings for five institutions, which has had an immediate positive impact on their bottom lines, freeing up additional resources for other important academic purposes.

For NJEFA, 2018 was the beginning of a new era in its mission to support New Jersey’s colleges and universities. In January, we joined New Jerseyans across the State in congratulating Governor Murphy on his historic election. In early April, NJEFA’s Board and staff welcomed a new Ex-Officio Member to the Board, Secretary of Higher Education, Zakiya Smith Ellis, and in early September, a new Executive Director, Eric D. Brophy, Esq. joined NJEFA’s team. Under new leadership and a new vision for higher education, our experienced and dedicated team of professionals are working with our institutions and our partners in State government to bring a broader range of financing services to institutions across the State.

Among new services will be public private partnerships or P3s in higher education, which have been made possible by the New Jersey Legislature’s passage of Senate Bill 865 and Governor Murphy’s signature of this landmark legislation in August. This new law has paved the way for the Authority for the first time to finance P3 transactions with private entities and colleges and universities in the development of academic and auxiliary facilities. The growing national interest in these structures signals their importance as one tool among many that can help institutions address their physical plant needs in an environment of scarce resources. Similarly, we are looking forward in the next several months to launching a new Tax-exempt Equipment Lease Financing Program that we hope will provide institutions with even greater opportunity for savings as they procure the equipment and instruments necessary to support their academic programs and operational needs.

With these and other exciting initiatives on the horizon, we are working hard every day to try and maximize the value we bring to our colleges and universities and the State. We thank Governor Murphy and the members of the New Jersey Legislature for their continued support of NJEFA. Most importantly, we recognize the leadership and dedication of our Members and the hard work and professionalism of our staff. It is through their efforts that NJEFA continues to support the missions of our colleges and universities, their students and New Jersey’s prosperity.
During its 51st year, the New Jersey Educational Facilities Authority continued to serve the interests of the State and its citizenry by supporting the advancement of higher education throughout New Jersey. The Authority completed $1.4 billion in total value of financings on behalf of the State’s colleges and universities. The year’s activity represented a record volume of issuance for the Authority and its continued commitment to securing financing solutions that help New Jersey’s institutions make critical capital investments in the building, maintenance and preservation of campus facilities and infrastructure.

Since its founding more than half a century ago, NJEFA has completed nearly $18 billion in financings on behalf of the State’s public and private higher education institutions. These transactions have enabled New Jersey’s colleges and universities to expand, modernize and save through $15.5 billion in standalone institutional transactions and $2.4 billion in state-backed transactions. These 515 financings represent a wide array of financing structures including: issuance of tax-exempt and taxable bonds, short-term notes, equipment leases, direct placements and state-backed financings. State-backed financings issued through the Authority include: Higher Education Capital Improvement Fund (CIF); Higher Education Facilities Trust Fund (HEFT); Higher Education Technology Infrastructure Fund (HETI); Higher Education Equipment Leasing Fund (ELF); Dormitory Safety Trust Fund (DORM) and the Public Library Grant Program.
Virtually every college and university campus across New Jersey, at both public and private institutions, have facilities and/or infrastructure financed with NJEFA bonds and state-supported grants administered through the Authority. These facilities have enabled expansion of student access and capacity. They have also enabled structural enhancements and modernization, and development of new state-of-the-art facilities to support innovation in learning environments and change in pedagogical approaches to teaching.

NJEFA’s service to the State and its impact on the advancement of higher education has allowed New Jersey’s colleges and universities to remain among the most competitive in the world as they provide exceptional academic opportunity for New Jersey’s students. The transactions successfully closed in 2017 enrich the lives of students, faculty and the New Jersey communities which rely on a robust academic environment to attract and retain an educated and highly trained workforce. As we review the accomplishments of the previous year, we congratulate our client institutions for their successes and stand ready to serve them in the years to come.

$17.9 BILLION
total issuance since inception
NJEFA set a record volume of issuance in 2017. A low interest rate market environment, refunding opportunities, critical plans for new facilities and renovation projects, and the looming threat of potential tax reform measures contributed to the Authority’s successful pricing and closing of 10 transactions. These transactions had a combined par value of $1.42 billion in issuance on behalf of eight institutions. This compares to the prior year’s record of issuance of $1.35 billion on behalf of nine institutions. The Authority’s record level of activity ranked NJEFA as the third largest conduit issuer in the State in 2017 and the fifth largest higher education issuer nationwide, according to Thomson Reuters.

Not only was 2017 a year of record issuance, it was also a year of record savings. Six institutions participated in refunding transactions totaling $1.1 billion in par value, which generated nearly $140 million in combined net present value savings. Over the past 10 years the Authority has provided New Jersey institutions $425 million in combined net present value savings. Nearly 80%, or $330 million, of those savings have been in the past 3 years.
While refunding activity dominated most of NJEFA’s volume of issuance, several colleges and universities took advantage of the year’s low interest rate environment to secure financing for their capital projects. New money issuance totaled $329.9 million in 2017, benefitting seven New Jersey institutions with projects that included a medical and health sciences building, academic buildings, residence halls and various other capital improvements and renovations across the State.

**2017 HIGHLIGHTS**

**BUILDING FUTURES THROUGH FOUNDATION**

**PRINCETON UNIVERSITY ISSUE 2017 SERIES B**

On April 4, 2017 the Authority closed a $342,240,000 tax-exempt current refunding transaction on behalf of Princeton University. Proceeds from the transaction will be used to refund a portion of the Authority’s outstanding 2007 Series E Bonds, 2007 Series F Bonds, and 2008 Series K Bonds. The transaction was structured as a negotiated sale and carried a true interest cost of 2.91%, a final maturity of July 1, 2036 and provided the University with net present value savings of nearly $53 million.

**PRINCETON UNIVERSITY ISSUE 2017 SERIES C**

A $141,095,000 tax-exempt transaction was also closed by the Authority on April 4, 2017 on behalf of Princeton University. Proceeds from this new money transaction will be used to finance construction, renovation, acquisition and installation of certain capital assets including the Firestone Library Renovation. The Firestone Library Renovation aims to create a building well-suited to support modern library services and a contemporary approach to scholarship while also providing the proper environment for one of the world’s great book and manuscript collections. Funding from this transaction will also be used on Princeton’s 20 Washington Road project, which will convert the previous Department of Chemistry building into a home for the Department of Economics, several international offices and the Princeton Institute for International and Regional Studies. The bonds were competitively priced on March 22, 2017, carried a true interest cost of 3.50% and a final maturity of July 1, 2047.

$1.42 billion issued in 2017
**RAMAPO COLLEGE OF NEW JERSEY ISSUE**

**SERIES 2017 A**

On April 5, 2017 the Authority completed a $99,450,000 tax-exempt bond transaction on behalf of Ramapo College of New Jersey. Proceeds from the transaction are being used to finance the renovation and redesign of the George T. Potter Library which will include creation of a learning commons where students, faculty and staff can experience an inviting space to learn, study and collaborate. Construction of the George T. Potter Library renovations are scheduled to begin during the summer of 2018 and be completed in the summer of 2021. Additional funds from the transaction were used to current refund a portion of the College's Series 2006 I Bonds. The transaction carried a true interest cost of 3.57%, a net present value savings of over $4 million, and a final maturity of July 1, 2041.

**STEVENS INSTITUTE OF TECHNOLOGY ISSUE**

**2017 SERIES A**

The Authority completed a $119,905,000 tax-exempt new money and refunding bond financing on behalf of Stevens Institute of Technology. Bond proceeds are helping the Institute to construct needed academic and parking space, and to refund outstanding debt. The transaction provided financing for the construction of the Institute’s new Gianforte Academic Center, which will consist of two four-story buildings connected by a skybridge. The Institute is targeting LEED Gold certification in the design of the structures, which once complete, will contain 17 smart classrooms, six advanced labs, 45 faculty offices, and house the Department of Computer Science and an array of multi-discipline laboratories. The new academic center is critical to the Institute’s advancement of research and education in healthcare, medicine, sustainable energy, financial systems defense and security, and STEM education. This project aligns with the Institute’s 10-year strategic plan of harboring an innovative learning environment and focusing on developing students in STEM disciplines to provide New Jersey with a well-rounded and competitive workforce. The transaction also financed the completion of the parking garage at the Babbio Center to create 266 additional parking spaces. A portion of the bonds also currently refunded all of Stevens’ outstanding 1998 Series I and 2007 Series A Bonds. This transaction achieved a true interest cost of 3.98%, a final maturity of July 1, 2047, and net present value savings of $7.3 million.

**New Jersey Educational Facilities Authority**

NJEFA works to support our institutions through every step of the financing process.
THE WILLIAM PATERSOSON UNIVERSITY OF NEW JERSEY ISSUE
SERIES 2017 B
On September 7, 2017 NJEFA closed a $27,065,000 tax-exempt bond financing on behalf of The William Paterson University of New Jersey to construct a new residence hall on campus. The new facility expands the residential portion of campus and provides amenity spaces for students currently unavailable at other dormitories on the campus. The new five-story, 89,400 square foot building consists of 288 residential beds organized into 72 dwelling units. Amenity spaces are distributed throughout the building with small lounge spaces, study rooms and student support spaces located on each floor. The main entry level has a laundry room, mail room, kitchen, and administrative offices. Additionally, there is a large multifunction room and accessory seminar room located directly off the main lobby for use by students and campus visitors. The transaction carried a true interest cost of 3.80% and a final maturity of July 1, 2047.

RIDER UNIVERSITY ISSUE
SERIES 2017 F
On November 30, 2017 the Authority closed a $41,770,000 tax-exempt bond transaction on behalf of Rider University. Proceeds of the bonds financed construction of a 30,000 square foot addition to the University’s Science and Technology Center, as well as renovations to the following residence halls: Conover Hall; Delta Phi Epsilon Sorority; Kroner Hall; Lake House; Ridge House; and Wright Hall. Proceeds will also be used to renovate several academic facilities, including Bart Luedeke Center Theater, Fine Arts Theater, Science and Technology Center; and Sweigart Hall. The transaction carried a true interest cost of 4.19% and a final maturity of July 1, 2047.

SETON HALL UNIVERSITY ISSUE
2017 SERIES D (TAX-EXEMPT) & E (FEDERALLY TAXABLE)
On June 29, 2017 the Authority completed a $71,435,000 bond transaction on behalf of Seton Hall University consisting of two series of bonds, the tax-exempt 2017 Series D Bonds and the federally taxable 2017 Series E Bonds. Proceeds from the $39.5 million Series D Bonds will be used to refund Seton Hall’s outstanding 2008 Series D Bonds. Proceeds from the $31.9 million Series E Bonds will be used to finance the renovation and equipping of a 412,000 square foot building and an 65,000 square foot building to be used for medical and non-medical education, research and clinical administration offices. The facility, Hackensack Meridian School of Medicine at Seton Hall University, will be the first private medical school to open in New Jersey in more than 50 years. The school will enroll 500 students within the medical program helping to address the shortage of physicians within the state and the nation. Seton Hall will relocate its College of Nursing and School of Health and Medical Sciences to the new site. Many of these students will have the opportunity to complete their training in some of Hackensack Meridian Health’s 16 hospitals. The 2017 transaction carried a true interest cost of 3.87% and a final maturity of July 1, 2047.
**Kean University Issue**

**Series 2017 C (Federally Taxable) & D (Tax-Exempt)**

On December 14, 2017 the Authority completed a $199,885,000 transaction on behalf of Kean University consisting of two series of bonds; the federally taxable Series 2017 C Bonds and the tax-exempt Series 2017 D Bonds. Proceeds from both series of bonds will be used for the advance refunding and defeasance of a portion of the Authority’s outstanding Series 2009 A Bonds and the Bergen County Improvement Authority’s outstanding Series 2010 A Bonds. The transaction carried a true interest cost of 3.60%, a final maturity of September 1, 2039 and provided Kean University with more than $18 million in net present value savings.

**Georgian Court University Issue**

**2017 Series G (Tax-Exempt) & H (Federally Taxable)**

On December 21, 2017 the Authority closed a $27,420,000 transaction on behalf of Georgian Court University. The transaction was composed of two series of bonds, the tax-exempt Series G Bonds and the federally taxable Series H Bonds. Proceeds from both Series will be used to make various capital improvements and renovations to University buildings and facilities and to advance refund the Authority’s outstanding 2007 Series Project D and 2007 Series H Bonds. This transaction carried a true interest cost of 3.95% with a final maturity of July 1, 2037 and provided $2.5 million in net present value savings to the University.

**Princeton University Issue**

**2017 Series 1**

The Authority closed a $357,105,000 advance refunding transaction on behalf of Princeton University on December 27, 2017. With looming tax reform legislation in Congress at the end of the year that threatened to end issuance of private activity bonds and advance refunding opportunities, the Authority and the University acted quickly to bring this financing to market. The revenue refunding bonds were used to refund a portion of Princeton University’s outstanding 2008 Series J Bonds and 2010 Series B Bonds. This transaction was the largest single transaction in NJEFA history. The Authority navigated volatile market conditions, again a result of pending tax reform, to successfully complete this transaction in five weeks from concept to closing. This financing carried a true interest cost of 2.97%, a final maturity of July 1, 2040 and provided the University with net present value savings of nearly $55 million.
During the fourth quarter of 2017, Congress introduced legislation, which proposed substantial tax reform measures. Known as the Tax Cuts and Jobs Act (H.R. 1), among the bill’s provisions were proposed sweeping changes to the municipal bond market, which included the elimination of all advance refundings and private activity bonds (PAB’s). Over the past three years advance refundings accounted for over $1 billion in NJEFA issuance, making up approximately 30% of the issuance during that time period. These two provisions alone could have had a severe and limiting effect on higher education infrastructure development nationally.

NJEFA monitored the bill along with many other industry representatives, with an eye toward helping institutions mitigate its potential impact on current capital financing plans.

At the time of proposed changes, NJEFA was working with Georgian Court University on a new money and refunding transaction. Nearly every iteration of the Tax Cuts and Jobs Act bill proposed the elimination of tax-exempt advance refunding and PAB’s, which put completion of Georgian Court University’s
transaction at risk. NJEFA worked swiftly and decisively with Georgian to successfully accelerate the pricing and closing of the University’s $27 million issuance. Doing so enabled the University to acquire the capital necessary to refund debt for savings and raise new capital for important campus improvement projects.

Princeton University was also anticipating a potential advance refunding transaction in 2018. Again, due to pending tax reform, execution of this transaction on a tax-exempt basis was threatened. To ensure Princeton would be able to complete the advance refunding if they chose, NJEFA worked with the University to execute an aggressive and accelerated financing timetable, which comprised five weeks from initial transaction discussions to closing. The highly successful transaction was the largest stand-alone issuance in NJEFA history: a $357 million advance refunding with net present value savings to the University of $55 million.

On December 15, 2017 a House of Representatives and Senate Conference Committee released a unified version of the Tax Cuts and Jobs Act. The final bill reformed the municipal bond market by eliminating future advance refundings effective January 1, 2018, while PABs remained unaffected. The bill also affected individual taxes with decreased tax rates in almost every bracket, increased the standard deduction for single and joint filers and eliminated the personal exemption among other reforms. The corporate tax structure also changed by decreasing tax rates from 35% to 21%.

The Authority is closely monitoring the effect of these additional reforms on the municipal bond market, including market access and investor activity.

The Authority remains committed to helping New Jersey’s colleges and universities navigate future market challenges.
Throughout 2017 NJEFA and the Office of the Secretary of Higher Education (OSHE) continued to build on their partnership to support the advancement of higher education in New Jersey. NJEFA has worked hand in hand with OSHE to administer two rounds of New Jersey’s Higher Education Capital Facilities Grant Programs resulting in an investment of over $1.45 billion in infrastructure improvements to New Jersey’s higher education facilities since 2013.

This historic investment in higher education began with the recommendation of the New Jersey Higher Education Task Force to sustain New Jersey’s colleges and universities through greater capital investment. The Task Force found that access to a high-quality college education that ultimately supports New Jersey’s economic development and workforce needs was critical for New Jersey to remain a leader in the global economy. The citizens of New Jersey agreed and when the $750 million Building Our Future Bond Act (BOF) for capital investment in our higher education institutions was put before the voters of New Jersey through referendum, it was overwhelmingly approved.

In addition to passage of the BOF Act, which was focused on expanding capacity at the State’s higher education institutions, a second law was enacted that paved the way for new issuance of bonds to fund new facilities grants under NJEFA’s four revolving state-backed grant programs: Higher Education Capital Improvement Fund (CIF), Higher Education Facilities Trust Fund (HEFT), Higher Education Technology Infrastructure Fund (HETI) and Higher Education Equipment Leasing Fund (ELF). Together, these five programs make up the Higher Education Capital Facilities Grant Programs.

Administration of the Higher Education Capital Facilities Grant Programs requires tremendous coordination between multiple state government agencies including OSHE, Treasury, the Attorney General’s Office, and NJEFA. Initially, that coordination centered on creation of regulations, drafting and distributing two rounds of solicitations and reviewing and approving many grant applications.

Today, continued partnership with OSHE and other State agencies focuses primarily on resolving post-issuance compliance matters and addressing a myriad of requests by institutions dealing with the use and application of grant proceeds and administering the grant requisition process.
In the nearly four years that funding for these projects has been available, major progress has been achieved across all programs and sectors. As of April 17, 2018, OSHE and NJEFA had processed nearly $1.2 billion to reimburse colleges and universities for their project costs.

Among all projects approved for grant funding across both cycles, 72 fell into the "major construction" category, meaning the project consisted of new construction, an addition or a renovation receiving $4 million or greater in grant funding. These 72 projects received approximately 85% of the total awards.

and other high demand programs that will prepare students for jobs in a variety of industries. The Center houses a working salon for cosmetology and esthetics students to master their skills; a Small Business Development Center to assist entrepreneurs in starting or expanding businesses; advanced Manufacturing and Environmental Control Technology shops equipped with the latest equipment; modern classrooms for professional development courses; and a state-of-the-art automotive training center where students can learn to be a mechanic using hands-on training.

**GCU — ARTS AND SCIENCES BUILDING: INNOVATIONS IN STEM EDUCATION**

Renovations to Georgian Court University’s Arts and Sciences Building are complete. The University’s goal was to help increase student engagement and motivation, foster academic research excellence, workforce readiness and address safety and access issues associated with arts and sciences. Renovations to the building included teaching and classroom technology enhancements, modernization and reconfiguration of laboratory spaces, installation of fire suppression systems, HVAC upgrades, improvements to fits and finishes throughout, and various equipment purchases to support scientific research and analysis.

**RAMAPO — STEM BUILDING UPGRADE**

Ramapo College’s STEM building upgrade project is centered on the first two floors of the existing G-Wing academic building that houses the School of Theoretical and Applied Science (TAS). Constructed in 1975, the G-Wing building needed major upgrades to provide modern STEM laboratory space for learning and research. In addition to constructing new, modern labs, the STEM building upgrade project will include the purchase of modern equipment, classroom technology and administrative areas to support high level research and learning. The STEM upgrades serve all majors in Ramapo College’s School of Theoretical and Applied Sciences by increasing their capacity and adding much needed laboratory space. TAS is Ramapo College’s second largest school, with 1,272 students enrolled. This project will also have a dramatic impact on the research activity of faculty members in TAS, increasing their capacity to conduct high-level research.

**GRANT FUNDED PROJECTS UPDATE**

As institutions continue to utilize grant funds to renovate and improve their facilities, the NJEFA is pleased share some of the transformative progress that is being made on campuses throughout the State.

**NJIT — LIFE SCIENCES & ENGINEERING CENTER**

New Jersey Institute of Technology’s Life Sciences and Engineering Center is a $21 million state-of-the-art research facility, of which $13.5 million was funded by BOF and HEITI grant funds. The new facility connects to the existing Otto H. York Center for Environmental Engineering and Science and increases the square footage of the complex by over 50%. Opened in September 2017, the four-floor structure adds 20,000 square feet of shared laboratory space and meeting space is designed for increased collaboration and trans-disciplinary strengths in engineering and the life sciences. The new facility also offers a two-story atrium and presentation space, an exterior plaza, and a student lounge area.

**RVCC — WORKFORCE TRAINING CENTER**

Raritan Valley Community College completed construction of a new 30,000 square foot Workforce Training Center in the spring of 2017. The Workforce Training Center provides programs in automotive technology, advanced manufacturing, emergency management, entrepreneurship, health science programs...
Oversight and direction of NJEFA is entrusted to a seven-member Board composed of five public unsalaried members appointed to five-year terms by the Governor with confirmation by the New Jersey Senate. The State Treasurer and Secretary of Higher Education serve as ex-officio Members and our statute provides for gubernatorial veto authority over all actions of our Board. The day-to-day operations of the Authority are managed by a skilled and experienced staff led by an Executive Director who is also the chief executive officer of the Authority.

Executive Director

Eric D. Brophy, Esq. was appointed to serve as NJEFA’s Executive Director and Secretary by the Members of the New Jersey Educational Facilities Authority on September 6, 2018. Mr. Brophy joins the Authority having most recently served as a partner at the firm of Diegnan & Brophy, LLC, a Monmouth County, New Jersey law firm specializing in business and municipal law. In his new role, Mr. Brophy will have overall responsibility for the operations of the Authority, including oversight and management of all statewide debt issuance and higher education capital facilities grants administered through the Authority on behalf of the State’s colleges and universities.

WHAT WE DO

THE AUTHORITY’S MANDATE IS TO ISSUE TAX-EXEMPT and taxable debt on behalf of qualified public and private institutions of higher education in New Jersey and to offer other financial debt instruments to facilitate their capital finance and development needs. In addition to helping institutions find the most favorable financing options to meet their goals, NJEFA administers the State’s Higher Education Capital Facilities Grant Programs on behalf of the Secretary of Higher Education.

NJEFA’s bonds and other obligations have no guarantee of repayment by the State unless authorized by statute. Exceptions occur only when the State assumes a repayment obligation and identifies a repayment source. The latter is the case in the State’s commitment to pay debt service on bonds issued under programs like the Higher Education Capital Grant Programs.

Projects that can be financed through the Authority include but are not limited to construction, renovation, improvement and expansion of academic buildings such as classroom facilities, laboratories and research facilities and

NJefa is New Jersey’s primary issuer of municipal bonds to finance the construction and development of campus facilities at public and private colleges and universities.
The Authority will take its transaction to market, capitalizing on the lower interest rates the Authority can obtain as a public fiduciary with a proven record for excellence. The Authority’s reputation for fiscal responsibility and integrity is impeccable and carries the practical benefit of lower interest rates for its clients.

The services provided by the Authority go beyond just issuing tax-exempt and taxable debt and administering grant awards for our clients. We take a hands-on approach to our financings and stay involved in each transaction from the initial concept to closing and through to the final maturity of the debt. Our staff provides expertise in financial markets, tax and securities law, and post-issuance matters. Our full-service offerings before, during and after the transaction is what sets us apart from other conduit issuers in the state. We process bond fund requisitions, invest bond proceeds, retain arbitrage rebate service providers and swap monitors, monitor continuing disclosure compliance, assist with tax and securities law issues and monitor for potential refinancing opportunities.

We are helping our clients invest in the treasures that are New Jersey’s colleges and universities, so they can provide the opportunities for our citizens that will build the future for all of New Jersey.

technology infrastructure. Also eligible are auxiliary service facilities such as dining halls, utility plants and energy infrastructure, libraries, dormitories, athletic facilities, parking facilities, student unions, administration buildings and campus healthcare facilities. Authority financing can be utilized as well for the acquisition of capital equipment such as high technology and research equipment. When advantageous, NJEFA can also aid institutions in issuing refunding bonds to achieve debt service savings and benefitting the school's budget.

Eligible institutions, including accredited two- and four-year colleges and universities, identify their capital and construction requirements and then work with the Authority to develop financing that will meet the fiscal needs of their projects.
