

**Office of the Attorney General
Department of Law and Public Safety**

Assembly Budget Committee Responses

Assemblyman Johnson:

- Please provide the number of motions by county prosecutors for preventive detention hearings in calendar year 2016 and 2017 to date.

Criminal Justice Reform was effective on January 1, 2017, therefore there were no pretrial detention motions filed in 2016. From January 1, 2017, through February 28, 2017, a total of 2,166 pretrial detention motions were filed statewide. This is the most updated information provided by the Administrative Office of the Courts.

- Please clarify if the New Jersey Transit Police is in possession of, or has plans to procure, body worn cameras for the protection of the officers and patrons.

While the New Jersey Transit Police Department is not within the Department of Law and Public Safety, it is the Department's understanding that the New Jersey Transit Police Department has acquired Body Worn Cameras and is in the process of deploying them.

- The Governor's FY 2018 budget reflects a \$3.6 million increase in revenue from the Division of State Police non-criminal record checks /fingerprint fees (p. C-6). Please provide the definition of a "non-criminal background check" as it relates to this fee increase. Please provide all the categories in which the fee will increase.

The following are examples of non-criminal record checks:

- Governmental entities of this State, the federal government, or any other State for any official governmental purpose, including, but not limited to, employment, licensing and the procurement of services;
- A person or non-governmental entity of any State that seeks to directly engage the services of the subject of the record, for the purpose of determining the subject's qualifications for employment, volunteer work or other performance of service;
- Attorneys-at-law licensed by any State for use in any contested matters docketed in any state or federal court or administrative agencies of this state;

- Private detectives licensed by the Division of State Police pursuant to N.J.S.A. 45:19-8 et seq. for the purposes of obtaining information in the furtherance of the performance of their statutorily authorized functions, as specifically enumerated by N.J.S.A. 45:19-9(a)1 to 9; and
 - A person for the purpose of obtaining his/her personal record request.
- The Commission on Capital Budgeting and Planning recommended \$1.1 million toward a boiler system replacement for the Division of State Police Troop A Headquarters. Please provide an overview of the expenditures associated with this specific capital recommendation.

The capital appropriation of \$1.1 million is requested to replace the aging, damaged and inefficient Black Seal boilers at the Troop A Headquarters, which are at the end of their expected life cycle.

The new modern high performance, energy efficient boilers will drastically cut energy consumption and achieve significant savings in the State's energy bills. The energy savings come from the improved efficiency of the equipment as well as from the modern boilers' modulating capabilities.

Assemblyman Burzichelli:

- First responders Statewide maintain they continue having difficulties communicating due to interoperability issues. Please provide an overview of the status of interoperability, specifically radio communications, between local emergency units such as fire, law enforcement, and emergency medical services not only within a municipality, but also from jurisdiction to jurisdiction as services are provided outside their jurisdiction through times of mutual aid.

At the State level, the issue of local interoperable communications is primarily addressed by the Division of State Police, the Office of Information Technology, and the Office of Homeland Security and Preparedness. The Statewide Public Safety Communications Commission which is administered in the Office of Information Technology has responsibility to foster interoperability and assist in developing plans that help local first responders. Through their actions there is a Statewide Communications Interoperability Plan (SCIP) that outlines the statewide landscape, as well as Tactical Interoperable Communications Plans (TIC-P) for each of the four homeland security regions. In addition, the Statewide Interoperability coordinator within the Office of Information Technology supports county and local first responder communications from an operational and planning perspective.

One of the primary responsibilities of the State Police Communications Bureau located in New Jersey's Office of Emergency Management (NJ OEM) is to enhance interoperability, capabilities, and operations for all agencies in accordance with National Response Framework,

goals promulgated by The Department of Homeland Security. One of the primary methods the NJ OEM uses to support interoperability is through the Statewide 700/800 radio system. Since 2007, the state has been engaged in a project that upgrades the statewide radio system, bringing on county and local public safety agencies when appropriate. This has had the effect of improving interoperability and operations in those areas. The radio enhancements are ongoing as it is a long term and costly project.

In the Office of Emergency Management, the Communications Bureau deploys personnel and resources to support first responder communications on an ongoing basis for special events and other needs. Some of the recent events include the Papal Visit in 2015, the Miss America 2016 pageant, and the several regional Air Shows. The technical staff of the Communications Bureau, along with the state interoperability coordinator, meets with county and local representatives to collaborate and try to develop solutions to local communications problems.

In conclusion, the State Police continues to work with our state partners, and to collaborate with local partners, to support radio Communications for first responders statewide to the highest extent possible.

Assemblyman Schaer:

- Please provide the total appropriation for cybersecurity and cyberterrorism in FY 2018 as compared to amounts expended in FY 2017 and FY 2016.

The SFY18 cybersecurity appropriations include a \$6 million appropriation from direct state service and a transfer of up to \$1.7 million from the vehicle rental surcharge. OHSP executes a \$2.3 million cybersecurity reimbursement collection from state agencies for cybersecurity and data protection related services and products. A total of \$10 million dollars will be available to support cybersecurity initiatives.

For SFY17, OHSP has approximately \$10 million dollars available to support cybersecurity related services and products. OHSP is on track to expend all available dollars.

During SFY16, OIT was the responsible agency to provide cybersecurity and data protection. OHSP does not possess SFY16 cybersecurity and data protection budgetary information.

- Please provide an explanation for the FY 2018 recommended decrease of \$10 million under Legal Services in General Government Services reflected in the Governor's FY 2018 Budget (p. D-245).

As specifically noted on page D-269 within the Division of Law Recommended Budget the \$10 million decrease in FY 18 represents the discontinuation of the FY 17 Division of Law one-time Supplemental for Outside Counsel related costs.

- The Governor’s FY 2018 Budget reflects slight incremental annual increases in the area of “Gang Member Arrest” under the State Police Investigation Branch (p. D-245). With the increase in recent gang violence, please justify the low recommended performance target in this category.

The FY 2018 Department of Law and Public Safety technical budget preparations began in September 2016. Data collected and analyzed at that point in time for *Gang member arrests* produced a Performance Target FY 2017 of 115. Divisions provide the Department with quarterly updates throughout the fiscal year. The FY 2017 actual number for three (3) quarters is 152.

It should also be noted that the NJSP arrests suspected gang members frequently. Under N.J.S.A. 2C:33-29, an individual must meet at least two of the criteria listed in the statute to be officially identified as a gang member. Considering the legal ramifications of inappropriately classifying an individual as a gang member, the NJSP is careful to ensure that evidence exists to support identification.

- The Governor’s FY 2018 Budget reflects significant annual increases in both the applications and systems vulnerability assessments conducted by the Office of Homeland Security and Preparedness (OSHP) through the category of Cybersecurity Awareness (p. D-249). Please share with the committee how, with perceived decrease in appropriations, the OSHP intends to achieve this mission.

In the past year, the OHSP has reorganized the vulnerability management function, hiring additional personnel, investing in new technologies and training, and developing efficient processes. In doing so, it has significantly increased the number and effectiveness of both the systems and application vulnerability assessments it conducts. The reorganization has also increased the OHSP’s ability to provide guidance to Executive Branch IT teams regarding remediation of discovered vulnerabilities as well as risk mitigation strategies. In FY 2018, the OHSP will continue to develop its vulnerability management program as a key component of its proactive cybersecurity strategy. The decrease in appropriation, which is the result of operational efficiencies, will have no impact on OHSP’s cybersecurity and data protection initiatives.

- The Governor’s FY 2018 Budget specifies that the daily per capita cost is \$449.67 per person incarcerated in a Juvenile Justice Commission (JJC) community program and \$679.96 in a JJC institutional facility (p. D-263). Please provide to the committee what comprises the daily per capita costs for juveniles incarcerated in either community programs or institutional facilities.

The Juvenile Justice Commission focuses on the rehabilitation, which is reflected in the costs of treating and housing youth in JJC facilities, whether secure or residential. Those who enter JJC facilities have ever-increasing and substantial needs, with approximately 97% suffering from a

diagnosed mental issue and approximately 80% struggling with substance abuse. These needs require significant costs to provide clinical services, therapy/counseling, medical services, and cognitive-based curricula. Changes in per diem costs are also attributable to the implementation of S-2003/P.L. 215 C.89.

Cost per Day

	FY 2015 Actual	FY2016 Actual	FY2017 Revised	FY2018 Estimate
Secure care per day	\$578.22	\$571.23	\$710.33	\$674.59
Community Programs per day	\$366.76	\$389.67	\$459.85	\$449.67

	2014	2015	2016
Average Daily Population	459	432	372

Incarceration is the most costly option in the continuum of juvenile rehabilitation. Over the course of a decade, the JJC has reformed the juvenile justice system to ensure only those juveniles who require a secure setting are placed in pre-adjudication detention and/or JJC placement.

The JJC funds prevention programs that serve approximately 17,000 young people each year.

Detention reform and early intervention have created alternatives to incarceration with better outcomes. The Juvenile Detention Alternatives Initiative (JDAI) has reduced the population at NJ’s juvenile detention centers by approximately 65%.

These efforts have also reduced the population at JJC’s secure and community programs. There has been a 14% reduction since 2015 and 19% decrease since 2014.

- Please provide an estimated date on which the Division of Consumer Affairs will have the on-line technology to accept Home Health Aide certification applications.

The online renewal of all licenses, certifications and registrations issued by any regulatory or professional board in the DCA, including certification as a Certified Homemaker Home Health Aide (CHHA), is already available.

The online submission of initial certification applications for CHHAs is expected to be available by the end of the current calendar year.

Assemblywoman Pintor Marin:

- Please provide the number of Division of State Police retirements in FY 2017. Please provide the number of officers that departed prior to their eligible retirement since FY 2010, designated by recruit class number.

As of April 1, 2017, 58 enlisted members have retired. Please see the attached summary of the number of officers that departed prior to their eligible retirement since FY 2010, designated by recruit class number.

Assemblyman Wimberly:

- Please provide an update on the State's plan for re-instituting the following programs: Gun Buy Back, Warrant Amnesty, and Driver's License Restoration.

We are currently engaged in internal discussions regarding possible proposals for implementing gun buyback programs in several locations throughout the State. Additionally, given the Legislature's stated interest, we have conducted preliminary discussions internally with respect to conducting a warrant amnesty program, but must offer the caveat that there are numerous logistical considerations that would have to be addressed with entities outside the Department in order prior to developing a proposal for such a program. This Office has not previously considered a driver's license restoration program, and will take the suggestion under advisement.

- Please provide an estimated date in which the Division of Consumer Affairs will regulate companies who "broker" in-home companion services and home health aides to ensure all individuals who have contact with the State's vulnerable citizens will be required to register and be accredited.

The Division is finalizing rules that will require such businesses to register as health care service firms and make them subject to the same standards as those applicable to agencies that employ individuals to perform these services, both to even the playing field among agencies and to help protect our most vulnerable citizens.

Assemblyman Singleton:

- Please provide an overview of how JJC inmates are grouped to meet educational requirements.

The JJC Office of Education (JJC OOE) groups students according to their educational ability based on transcripts, test scores, and records that are received from the sending, or most recent, school district the student has attended. In addition, an initial assessment is conducted for every student to identify the student's current academic abilities so he/she can be provided with the most appropriate grade-level materials in the classroom, along with differentiated instruction.

The JJC uses a full-inclusion teaching structure system incorporating special education and non-categorized students in the same classes. In each class, students have their own individualized education plan or individual pupil plan. Teachers teach to the individual and often combine project-based lessons as well as group lectures for instructional purposes.

- Please provide the pupil to teacher ratio.

The maximum student to teacher ratio permitted by law is twelve (12) students to one (1) teacher. In most cases, JJC school groups rarely exceed 6-7 students per 1 teacher in a classroom.

- Please provide an overview of the consistency of the education received by JJC inmates as compared with the educational curriculum being used for K-12 education Statewide.

The JJC OOE works closely with the NJ Department of Education (NJ DOE) to meet the educational requirements and needs of its students. While the JJC follows current NJ DOE curriculum guidelines, alternative approaches to educational instruction and varied curricula are often implemented to meet the dynamic and varied intellectual needs of its students. Due to the JJC's specialized population, NJ DOE has also advised JJC to utilize alternative approaches to supplement, replace and/or enhance its educational instructions with project based learning; structured learning experiences; and modified curricula. In addition, the JJC utilizes the online comprehensive learning system, PLATO to provide credit recovery, advanced learning opportunities, remediation, career exploration, basic skills, and a host of other educational options. This approach allows the JJC OOE to meet the varied needs of every student as an individual learner and in regard to his or her respective educational level. This structure takes into consideration the preparation for standardized tests, and at the same time builds a foundation for the student to find education meaningful and purposeful.

- Please provide a list of the technical programs and certifications which are available to JJC inmates.

The list of technical programs includes horticulture, culinary, cosmetology, building maintenance (plumbing, building trades, construction), animal husbandry as equine instruction, business management, sign design, video media technology, and computer skills. Additionally,

the JJC is in the process of expanding opportunities to include a graphic design teacher and recording technician. A Serv-Safe certification also prepares students to work in the culinary field.

Through a contract with Mercer County College, college-level academic classes and certified programs in culinary and auto mechanics are also provided. Through Brookdale Community College, auto technology (brakes, suspensions, engine repair) will be available to students this summer.

The JJC is committed to a strong Career Technology Education program and will continue to make improvements in order to provide students with an effective and thorough education at all facilities and sites.

- Please provide an overview of security measures being considered by the State regarding employees of Transportation Network Companies, such as Uber and Lyft. Please specifically comment on the standards being considered to ensure public safety.

N.J.S.A.39:5H-17(a) imposes upon transportation network companies the obligation to secure the Attorney General's approval of the method the transportation network company (or third party designated by the transportation network company) proposes to use to conduct a criminal background check for an applicant or driver. If the Attorney General does not approve the proposed procedure within a six month time frame, the transportation network company would be prohibited from permitting an applicant to log on to its digital network as a driver or provide a prearranged ride as a driver until the applicant submits to a fingerprint-based criminal history record background check performed by the Division of State Police. Presumably, the question seeks information on the standards that will be applied in considering whether to approve the criminal background check methods proposed by transportation network companies. At this juncture, internal discussions have focused upon two aspects of the proposed methods, namely the efficacy of the identity verification procedures employed by the transportation network company (whether the proposed procedure includes sufficient means to ensure that the criminal records being checked are in fact those of the individual being screened), and the breadth and adequacy of the criminal information and motor vehicle history databases being consulted to determine whether an applicant or driver is subject to any disqualifications from matters occurring in New Jersey or in other jurisdictions. Additionally, consideration will be given to the frequency that the proposed procedures re-checks previously approved applicants and drivers to ensure that there are no subsequent disqualifying convictions. Specific standards have not been promulgated at this juncture.

Assemblywoman Rodriguez-Gregg:

- Please provide a list of all State suicide prevention resources supporting State and local first responders. Please provide the cost associated with all the suicide prevention programs and indicate if additional funding may be needed for each program noted.

Within the Department of Law and Public Safety, the Office of Employee and Organization Development (OEOD) provides suicide education and awareness to new recruits at the State Police Academy. The Office also teaches a class on suicide prevention to middle managers in the New Jersey State Police. OEOD staff are on call 24 hours a day, 7 days a week and are available to any trooper in need. The office includes six staff and is budgeted at approximately \$460,000.

Other State resources include the Cop 2 Cop hot-line which is available to first responders in the state, within the Division of Mental Health and Addiction Services in the Department of Human Services. The program is budgeted at \$400,000.

Assemblyman DiMaio:

- Please provide any existing historical data concerning whether persons who are issued carry permits commit any crimes or other illegal activities.

The Firearms Unit in the Division of State Police has no knowledge of any historical data retained regarding carry permit holders who have committed crimes.

Assemblywoman Maher Muoio:

- The Department of Law and Public Safety outsources certain legal cases. Please provide a list of cases and assignments for which outside counsel was retained, by department, including the amount paid per case for calendar year 2016 and 2017 to date.

Please see the attached spreadsheets.

- Please provide the expenditures associated with the "Bridgewater" case to date.

Since January 2014, the Division of Law has approved \$9,147,272.93 in invoices for Gibson, Dunn & Crutcher LLP and \$3,218,866.56 in invoices for Stroz Friedberg, LLC, in connection with representation of the Office of the Governor.

- Why are the funds generated by the Board of Nursing being diverted to the General Fund? Should the funds not remain at the Board of Nursing so additional staff can be hired as well as technology be updated to effectively and efficiently process the very important work done by this vital agency.

With the current staffing levels and new enhancements to technology, the Board is meeting its mission.

- P.L. 2014, c. 29 was signed by Governor Christie on August 1, 2014 to take effect on the first day of the 18th month following the date of enactment. This law requires health care service firms be accredited by an approved accrediting body. The correlated regulations are yet to be promulgated. When will the regulations be published for stakeholder input?

P.L. 2014, c.029 requires health care service firms that are registered with the Division of Consumer Affairs to obtain accreditation and meet certain other requirements as a condition of registration. The Act was signed into law on August 1, 2014 and became effective on February 1, 2016. The Division continues to work toward fully implementing the statutory requirements. The Act requires any agency that provides companion services in the home to become registered with the Division as a health care service firm. In addition, the Act provides that as a condition of being registered with the Division, a health care service firm must obtain, within 12 months of registration, accreditation from an accrediting body that is recognized by the Commissioner of Human Services as an accrediting body for homemaker agencies participating in the Medicaid program, as set forth in regulations promulgated by the Commissioner. Under the Act, the Division must enter into a Memorandum of Understanding (MOU) with each of the accrediting agencies recognized by Department of Human Services.

On February 1, 2016, the Division began registration of firms providing companion services, and advised all firms seeking registration (and those currently registered as health care service firms) that the requirement to obtain accreditation would be implemented once the Division proposed and adopted regulations. The Division has executed MOUs with four of the five accrediting bodies recognized by Human Services. The Division anticipates that the fifth MOU will be executed shortly. Draft regulations are currently being prepared for publication in the New Jersey Register. The Division anticipates proposing the regulation that will establish the accreditation process within the next several weeks. The Division further expects to propose the more comprehensive rule establishing standards for health care service firms that offer companion services within the next several months.

- Recently, Attorney General Porrino issued a directive creating the Community-Law Enforcement Affirmative Relations (CLEAR) Continuing Education Institute, based at the State Division of Criminal Justice, and establishing a system of mandatory training. Please provide more detail on this program. How is your office ensuring that every police officer receives this training? Who conducts the training? Who in your office oversees the program? Who determines the curriculum? How many courses are offered in person versus online?

The CLEAR Institute, bound by provisions of P.L. 2016, c. 23 and created by Attorney General Law Enforcement Directive No. 2016-5 (“Directive”), was created to identify or create uniform cultural diversity training courses to promote positive police interactions with, and community outreach to, all residents within our New Jersey communities, inclusive of racial, ethnic, and religious backgrounds and lesbian, gay, bisexual, and transgender individuals. The CLEAR Institute will serve multiple functions: (1) it will provide law enforcement trainers a library of pre-approved courses of instruction available for credit that meets the Directive's requirements; (2) it will review existing courses or curriculum and approve for credit those that satisfy the Directive; (3) it will provide basic statewide uniform training for all law enforcement officers; (4) it will create new courses or curriculum using subject matter experts; (5) it will provide standards to review courses or curriculum for credit; and (6) it will collect reports from local, county, and state law enforcement agencies demonstrating compliance with the Directive.

The Prosecutors Supervision & Training Bureau (“PS&TB”) of the Division of Criminal Justice (“DCJ”) is responsible for the oversight of the CLEAR Institute. Submitted curriculum will be vetted by PS&TB, and either rejected, approved, or proposed for modification to become an approved CLEAR course. Approved curriculum will be added to the CLEAR Institute Curricula/Library. Courses will be made available to all state, county, municipal, and campus police departments in New Jersey, as all law enforcement officers are required to take five credits prior to December 31, 2017. These courses will be offered through CLEAR in various formats, including webinars and electronic recordings, to accommodate officers' schedules and law enforcement agency's staffing needs.

DCJ and the Division of Mental Health & Addiction Services already developed a five-credit course entitled Police Response: De-Escalation Techniques for Individuals with Special Needs/Mental Health Issues. This course of instruction provides basic statewide training for all law enforcement officers in the areas of identifying and providing services for individuals with mental health special needs and de-escalation techniques. This course is co-taught with a subject matter expert in mental health and a law enforcement officer. To date, sixteen “Train the Trainer” sessions were held throughout the state providing training to over 1,000 mental health and police trainers. The CLEAR Institute is also in the final stages of developing a new three-credit course entitled Cultural Diversity and De-Escalation. DCJ partnered with subject matter experts in the area of law enforcement and cultural diversity, community interest groups, faith-based groups, and academia, to develop this training. This course will be ready by the fall of 2017 and will provide the three-credit training scheduled for 2018, the second year of CLEAR.

Long-term, the CLEAR institute will have a five-year training cycle. Law enforcement officers will be required to take a special needs/mental health de-escalation course and cultural diversity

de-escalation course at least once every five years and electives for the remaining three years of the cycle. The CLEAR Institute will develop a reporting system for compliance with the Directive. Before January 31st of each year, every law enforcement agency shall report in writing to the appropriate County Prosecutor, or to the CLEAR Institute directly (for State law enforcement agencies), documenting: 1) the number of sworn officers employed by the agency who satisfactorily participated in at least three credit hours of qualifying continuing education during the preceding calendar year; and 2) the steps that will be taken to ensure that any officer who did not participate in the appropriate credit hours of qualifying continuing education will satisfy that year's requirement as soon as practicable. Each County Prosecutor will report to the CLEAR Institute both municipal and county law enforcement agency compliance with the Directive.
